

Math Worksheet: Area (1)

1. Calculate the area of each shape shown below.

Complete rectangle
and calculate its area

$$90 \times (70 + 80 + 20) = 15300$$

Calculate area of white
rectangle

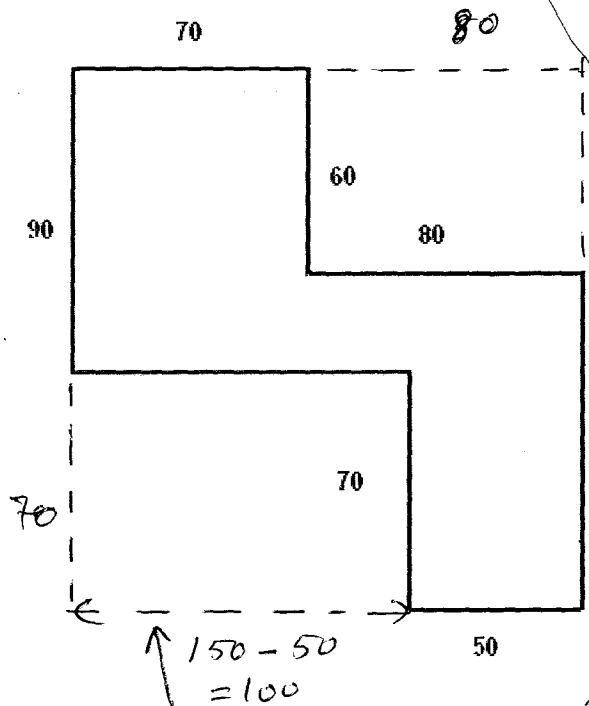

$$60 \times 80 = 4800$$

Subtract :

Area of shaded part

$$= 15300 - 4800$$

$$= \underline{\underline{10500}}$$

Complete rectangle and
calculate area

$$(70 + 80)(90 + 70) = 24000$$

$$\text{White area} = 60 \times 80 + 70 \times 70$$

$$= 4800 + 4900 = \underline{\underline{11800}}$$

$$\text{shaded area} = 24000 - 11800 =$$

$$\underline{\underline{12200}}$$
